MEASURE YOUR WRIST FOR THE PERFECT FIT

Ruler is to actual size, when printing, do not scale to fit.
Print at 100% (or "Actual Size")

cut along solid gray ✂

Follow These Steps To Get A Precise Measurement of Your Wrist

1. To ensure that you have printed this sheet at 100% scale ("Actual Size"). Place a credit card or id over image of the credit card to the right. Your credit card or id should fit almost exactly over the image and should not be too large or too small (less than 1/8 of a cm in error is acceptable). If the credit card is either too large or too small, please make sure that you have printed this sheet at 100%. If you continue to have problems we recommend simply using a tape measure to measure your wrist.
2. Once you have verified that you have printed this sheet correctly. Cut out the ruler template as closely to the edge as possible (do not cut off the peak of the marker at 0 centimeters).
3. Once the ruler is cut out, wrap it around your wrist and tighten it so it fits comfortably. Not too loose or too tight around the wrist.
4. With a pen or pencil, mark on the ruler where the starting edge lies on the ruler. Round up to the nearest 1/4 cm mark for the bestfit.
5. Go back to our website and select your watch size from the drop down provided.
